TELL YOUR STORY WITH CHIME MASTER

Every bell tells a story in its own uniquely beautiful voice. Bells count the time, celebrate with newlyweds, mourn the passing of a loved one, and call people to worship. A cast bronze bell will speak for hundreds of years, providing an enduring reminder of your presence in the community.

“We are very pleased with the performance of your product, the ease of your company’s customer service, and the joy of hearing our historic church bell ring again.”

*Fr. Mikel A Polson, Saint Michael Catholic Church,
Crowley, LA*

We'll Find What's Right for You

No matter the size of the project we will listen to your needs and work with you to develop a plan to meet your goals. Our expert campanology and engineering team will work with you every step of the way, from site survey and need assessment, to instrument design, building and installation.

BELL AUTOMATION EQUIPMENT

LIBERTAS BELL CONTROL

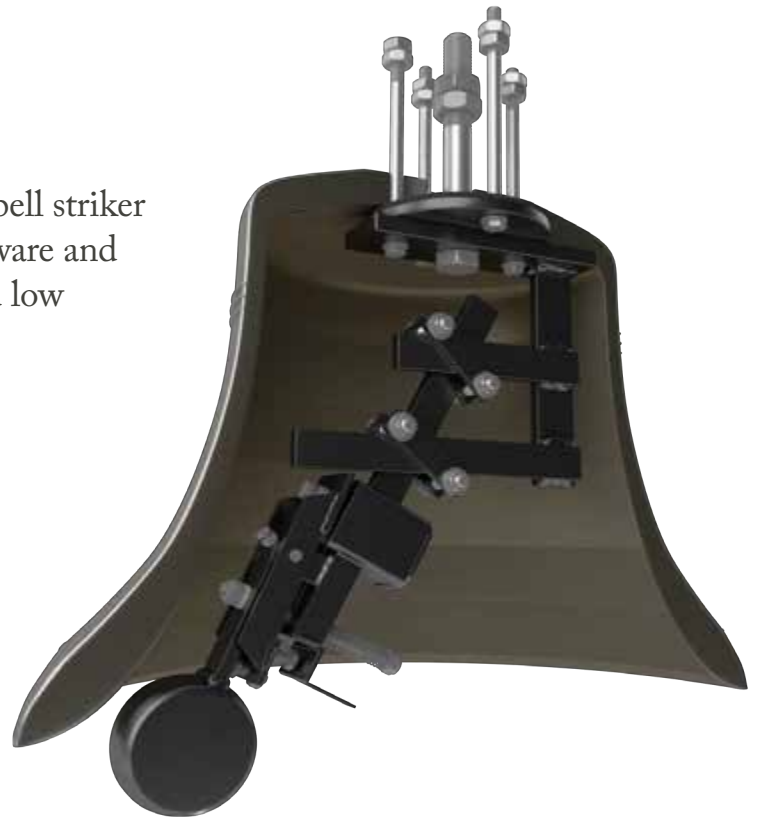

Take full automatic control of one or more bells with a Libertas Controller, a great solution for installations of any size.

Extensive library of music for chime and carillon instruments
Ringing for times of worship, prayer, celebration and mourning
Catholic, Protestant and Orthodox traditions are supported
Selection of time strike chime melodies for any set of bells
Auto daylight time adjustments
Accurate clock with network sync
Simulation of swinging effects for stationary bells
Easy weekly scheduler

SONANT™

A Sonant Bell Hammer is a premium electric bell striker that combines high quality stainless steel hardware and custom brass bushings to provide a reliable and low maintenance solution for any project.

Easy to install and adjust
Stainless hardware and bronze oilite bearings
Hot-dipped galvanizing and painted finish
Optional all stainless-steel construction

“... While this may have been a small job for their company, they made us feel like we were one of their most important customers.”

John E. Bosio, Lutheran Church of Hope, Broomfield, CO

ROTARY CHAIN DRIVE

Nothing makes a more joyful sound than a peal of swinging bells. We offer the broadest line of components available for swinging your bells exactly the way you want.

Intelligent swinging motor control electronics

Heavy-duty nickle plated chain

Dual Motors available to swing bells up to 16-tons

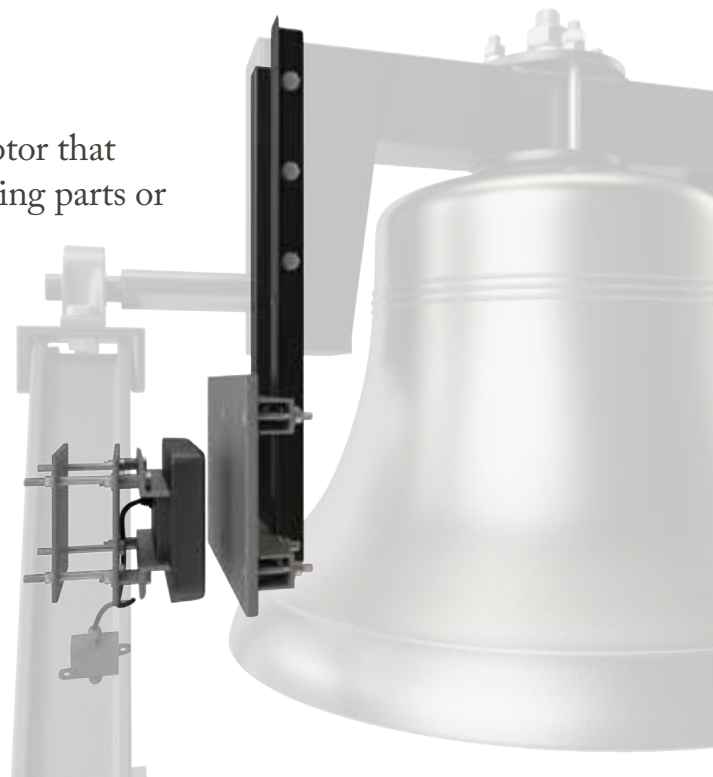

MAG FORCE™ DRIVE

The IntelliSwing Mag-Force Drive is a swinging bell motor that uses magnetic forces to swing a bell quietly without moving parts or significant maintenance.

Touch-less, friction-less and nearly silent running

Needs no wheel like rotary drives.

Maintenance free design never needs bearings or lubrication

INTELLI-SWING™ Key Features

Three year Chime Care™ warranty

Consistent bell ringing

Customized systems for your unique bells

All solid state current switching and rotation sensing

RESTORE YOUR VOICE

Whether cast of bronze or iron alloys, every bell is a treasure worth keeping. From a complete rebuild using modern materials to a historical restoration with custom cast iron hardware, our restoration team can make an old bell new again.

Cleaning/Polishing

Cracked Bell Welding/Repair

Steel Wheels, Clappers, Yokes and A-Stands

Wooden Wheels and Yokes

Original Hardware Restoration

Hot Dip Galvanizing/Stainless Steel available

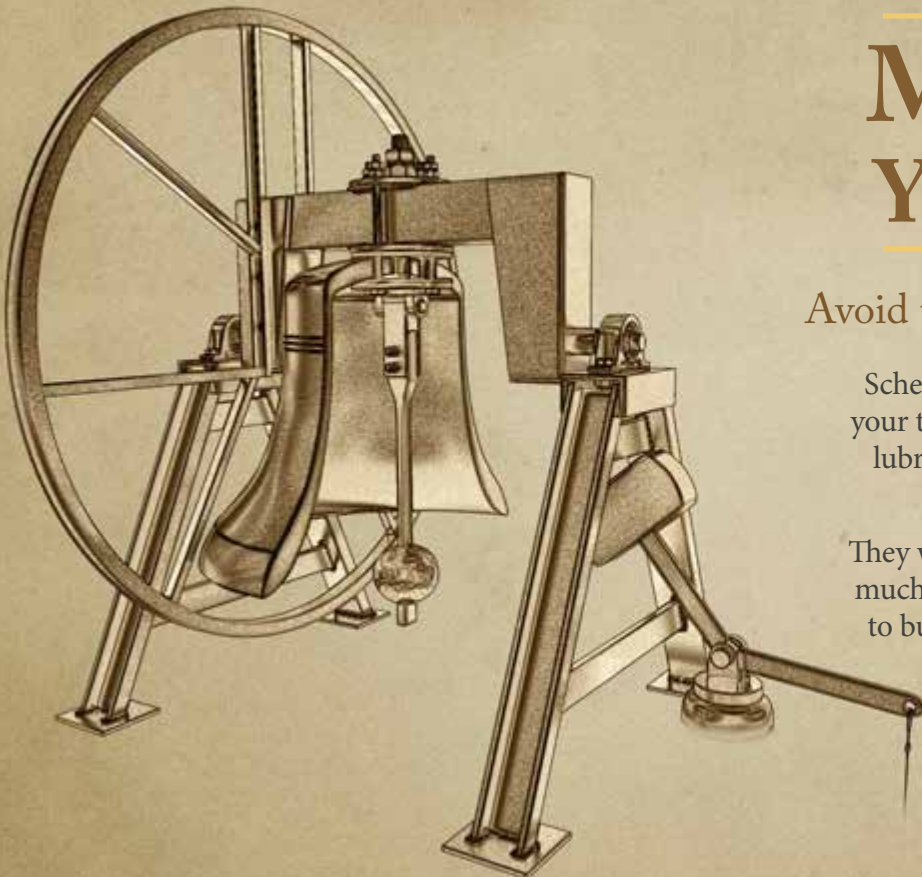

MAINTAIN YOUR VOICE

Avoid the Disappointment of Silent Bells

Schedule our factory trained technicians to visit your tower at least once per year to expertly clean, lubricate and adjust your bells, mountings and ringing action.

They will inspect every part and let you know how much useful life is left in each piece, allowing you to budget for upgrades and renovations to keep your bells ringing.

CONNECT

from

ANYWHERE

Church Bell Remote™ Mobile App

This mobile app is a great way to control your bells when you can't be near the carillon system. A quick tap of your mobile device screen will ring the bells for any special occasion.

Key Features:

- Customizable buttons for desired ringing and music
- Ability to suspend/re-activate automatic schedule
- Select and play any selection
- Millennium/Platinum keyboard performance and recording
- Restrict access times and functionality per user

Management Suite

Chime Master's plain English setup has enabled thousands of churches to simply set and forget their automatic bell ringing schedule. Our Management software adds graphical versatility to simplicity. For decades we've led the industry with advanced ringing technology, and are excited to present the latest release of this powerful software.

Key Features:

- Easy weekly schedule editing
- Graphical review and setting of clock striking schedule
- Create and perform concert set lists
- Setup and backup of all system settings
- Synchronize all connected clocks to internet time
- Free lifetime software updates and support

Additional Libertas Bell Control Features

- Enables remote control mobile app
- Graphical review and setting of clock striking schedule
- Administration of Remote app user authorizations
- Annual and special event scheduling
- Setup and backup of all settings
- Multiple weekly schedule management for automatic changes

"We are finding that ease of operation is prompting us to use the bell more."

*Rev. Ivan L. Norton, Bridgewater United Church,
Bridgewater, NS*

CAST BELLS

There may be no instrument more durable than a bell. A bell will ring out for centuries, providing a tireless voice to remind everyone of your presence. From one bell to a grand carillon, our network of world renowned bell foundries, architects, and engineers gives us the ability to work with you to design and build an instrument for the ages.

We have extensive experience renovating and expanding chimes and carillons of all sizes and seamlessly integrating new bells into existing instruments.

CLOCKS

Is your tower clock accurate only twice per day? Do you have a different time displayed on each face? Our clock services range from new installations to full historic restorations complete with custom cast glass panes to preserve the history of your clocks.

We are experts at providing complete turnkey solutions for your timekeeping needs. From a standalone clock to a fully integrated electronic carillon that rings a real bell to strike the time and also controls your tower clocks. Give us a call and we will work with you to find a clock solution to fit your needs.
